Foreword from President

It has been 16 years since we started our foundation with the aim to help the underprivileged community by providing them Capacity building through Skill Development Activities, education, and livelihood. As I look back, I am happy with the progress and growth we have made and I hope we will grow even bigger and better and do our part towards contributing to the society. It gives me immense pleasure to say that I work with the same zeal and Enthusiasm as I did when I started and so do all the members of the foundation. With every Passing year as the needs in our mission is growing so are the challenges we are facing, but the efforts on all of our parts are doubled and we are giving our best to mobilize the resources we need. One of the most important things that have kept us going is the smile on the face of our beneficiaries and their words of gratitude.

The annual report for the financial year 2021-22 will provide you with our journey in the past year and the Progress we have made so far. We have some exciting ideas/projects to work on this year and with our entire joint efforts I hope it will be a success.

I am confident that AVSK will continue to work successfully to bring relief to those who suffer from unemployment, and discrimination.

Quote

“Work for a cause, not for applause. Live life to express, not to impress. Don’t strive to make your presence noticed, just make your absence felt.”

Foreword from Secretary

One more year elapsed in our striving for bringing about qualitative change in the socio-cultural scenario of the Bihar, more specifically in the livelihood of the underprivileged section of the society.

Let me take this opportunity to share with you how far we have succeeded in this striving till now. The year 2021-22 was undoubtedly a crucial year which had put up before us new challenges side by side with the old and familiar ones. I'm Proud to say that the year 2021-22 was undoubtedly a crucial year I'm proud to say that AVSK has been able to address most of these Challenges with considerable success only because all of you stood by us with your collected might in this struggle. Let me thank you for this from the core of my heart.

However, the journey of social welfare is a never-ending course. With the passage of time the challenges are multiplying. We're committed to dedicating ourselves to meet these challenges and ensure a happier and healthier society to the last drop of our blood. I know you our Partners, Team Members and well-wishers have done your best in extending support to us. You have bound us in a bond of love and trust. No words are enough to thank you. AVSK will remain ever obliged to you. We expect similar help and guidance from you in the years to come

With Warm Regards,

Secretary

Working Towards Health of High Risk Groups

AVSK celebrated World AIDS Day at the Kaimur (Bhabua), Bihar, on First December to Eight December. World Aids Day is observed on December 1 every year to create awareness about the symptoms, causes and preventives of the pandemic disease HIV/AIDS that has taken unprecedented number of lives. The programme was

organized in collaboration with local clubs. The resource persons/doctors who are from Kaimur AIDS Control Society (ACS), Govt. of Bihar gave full cooperation for the programme and gave awareness lecture on AIDS and how to protect themselves from the transmission of this disease. Celebration of World AIDS Day is symbolically a call to enhance social protection mechanism for people with HIV and alert governments in framing unbiased policies for vulnerable population so that they enjoy equal status in the society. Our organization is constantly striving and taking initiatives on AIDS awareness and to reach both urban and rural areas. Our Experience said “Even though the number of people living with AIDS has been reportedly declining it is still an alarming issue and needs a united front against it.” We also appealed to the people to work together and eradicate the spread of HIV. 120 people participated in the programme and light refreshment was served. Various awareness programs like painting, interaction between youths and parents were taken up.

Blood Donation Camp

We organized a camp on blood donation at Sadar Hospital (Bhabua) Kaimur, Bihar on 18.08.2021. The program is scheduled to continue throughout the year in different times of the year as the year passes through a crisis of blood. Over 15 bottles of blood were collected during the camp.

A team of Doctors, paramedics and volunteers were positioned all over the mall to ensure a safe

and hygienic camp. While all the professionals followed stringent screening procedures and good laboratory practices for testing, processing and collecting blood, donors' details were documented carefully by the volunteers. The initiative witnessed wide participation from more than people, residing in various parts of the Kaimur.

We also thank our team members for their efforts to making the camp successful. We all planned to have more such Blood Donation camps in future with proper intervals. The Blood Donation Camps provided opportunities to us to give extend our Institute services to the community.

Improve Farming Productivity

Krishimela an important tool in transferring latest technologies to farmers is gaining momentum over the years. A large amount of money is involved in this extension activity. Krishimela is an important mass contact method of Extension Teaching. It envisages a large scale display of improved agricultural

technologies and farm inputs for the benefit of farmers. It is an integrated extension approach consisting of individual, group as well as mass contact methods with appropriate audio visual aids. Owing to its powerfulness in changing the behavior of farmers, farm women and youth, in terms of knowledge, skill, attitude and symbolic adoption.

The purpose of organizing Krishimela by Agricultural University is to provide first hand information to farmers about the availability of technology useful to them and also to inform them about the ongoing research activities on various problems of farming. As the Krishimela is an annual feature of Regional Agriculture Research Station (RARS) Bijapur, it is being organized on a large scale in co-ordination with all the development departments. Farmers of all taluks are invited to participate in it. Since “seeing is believing” farmers are actually shown, all the latest technologies which are available for them in the field of Agriculture and allied sectors. At present there has been increasing demand for organizing such Krishimelas at different levels to meet this concept AVSK Also Organized Krishimela Adhura at Kaimur (Bhabua), Bihar, in this Krishimela’s about 250 farmers were present.

Self Defence Program

Women generally are a neglected lot and the women living in distress specially the women

who do not have any support system are a hundred times more vulnerable, exploited and oppressed. Dowry deaths and abandonment of legally wedded women is common and those who do have a live in relationship are uncountable.

Team AVSK provided one day training to intermediate students on self defense, where they can defend themselves from the outer forces. Self-defense training is a life skill that helps girls to be more aware of their surroundings and be prepared for the unexpected at any time. Through the self defense training, the girls are taught to become psychologically, intellectually and physically strong enough to protect themselves in times of distress. Girls Students who can protect herself from uncanny situations can also protect others in distress.

Connecting the last mile

A hungry stomach is always a soul standing in the well of pain and loss. People spending their life on the streets and footpaths have become a common sight in recent times. Impoverished people who can't manage the budget to buy a roof over their head struggle to survive on the footpaths and flyovers of well-built metro stations in different areas of Kaimur.

Our volunteers at Adiwasi Vanvasi Sewa Kendra Distributed blanket & Foods in different regions of Kaimur, and other places too. The pleasure in fulfilling the basic requirement of people carries a different feeling that can't be explained in words. Homeless people mostly reside in slum areas by constructing shacks and wooden houses with available materials. They don't have clothes to cover their body, and they spend their winter without a blanket. And that's the reason behind the death of thousands of people every year in the winter season. Whenever we visit such places with our volunteers, we get a question in our mind that isn't our responsibility to assist such poor and needy people in living a life full of hope and opportunities? In n each shack, we come across several people and give them blankets along with clothes. Also, we distribute blankets to abandoned people living a hopeless life, and we are endeavouring to bring some shadows of hope in their lives.

Integrated watershed management program

The Integrated Watershed Management Programme (IWMP) is the result of the new and unified approach of the GOI for treatment and development of the new generation watersheds in a realistic and holistic manner. The Government of India through the National Rainfed Area Authority (NRAA) has evolved the Common Guidelines, 2008 for implementation of the Watershed Development Projects. The major areas

in which paradigm shift has been made under the programme are, inter-alia, institutional funding of the State Government through the State Level Nodal Agency (SLNA) at the State Level, constitution of District and Project Level Institutions for implementation of the projects for the Participatory Watershed projects with financial, social and economic empowerment to the watershed communities in close coordination with the local institutions. Another aspect is the equity and participatory resources management with due regards to the economically weaker section within the village community. AVSK Organized Integrated Watershed Management Programme (IWMP) at Kaimur-Bihar.

The main objectives of this programme are as follows:

- To dissipate soil and water erosion and surface run-off.
- To harvest/recycle surface runoff and rainwater.
- To enhance soil moisture regime/water holding capacity.
- To promote sub-surface flow, base flow and ground water recharge.
- To improve soil health and tilth.
- To improve production and productivity.
- To promote generation and gainful employment opportunities.

Road Safety Awareness Program

Road safety awareness program was organized to make people aware about the importance of Road Safety and how we can reduce the deaths/ injuries due to road accidents in the district Kaimur of Bihar. Regarding this, Adiwasi Vanvasi Sewa Kendra, Kaimur was continuously involved among the general people and tried to know the present level awareness about road safety and explained people about various ways to prevent such

accidents/ injuries.

The aim of our team was to make the entire district, whether rural or urban, aware of road safety and the importance of following rules and regulations. The only way possible to fulfill this objective was with a vehicle. So the organization arranged an erickshaw for Promoting the cause. The e-rickshaw Prachar Vahan was prepared by the organization with a flex banner, fabrication and loudspeaker, with many pamphlets, banners, stickers and it visited almost all the areas of the district, with the loudspeaker constantly ringing on the Prachar Vahan to promote road safety and educate people about its importance. The road safety rules and regulations were being promoted and the team members were constantly meeting people, where needed. This program was very well appreciated among the people of Kaimur. Publicity material along with information about Road Safety was also being transferred to the people from this vehicle.

Save water Awareness Program

Public water conservation campaigns raise awareness in all levels of society about the importance of saving water to cope with its scarcity and ensure sustainability. The aim is to change citizen attitudes and behavior to improve water use efficiency. This is done through education and awareness campaigns on the socioeconomic and environmental benefits of water conservation and different conservation methods. Communication means include traditional and social media, as well as direct communication such as workshops, presentations, stakeholder dialogues, etc. Other means such as economic incentives can also be employed, for example, free installation of water meters. Raising water conservation awareness is important as the combined impact of even small improvements in individual household use can amount to significant savings at a municipality or regional level. AVSK Organized Save water Awareness Program at Kaimur. On that program 160 Community's Peoples were participated.

Population Control Program

The family welfare program seeks to promote, on a voluntary basis, responsible and Planned Parenthood of a two-child norm devoid of any bias for or against the sex of a given child. Use of the mass media and interpersonal communication to explain various methods of contraception and remove socio cultural barriers has led to an increase in the number of family planning acceptors in recent years. However, despite the family welfare program being in operation for four decades, population continues to grow at an alarming rate. It is clear that program strategy and mode of implementation must be reviewed. The state government of Bihar is determined to implement the family welfare program effectively through the motivation and education of married couples, while making various types of contraceptive services available to the people. We have also put our effort to support the Government family welfare program at Kaimur.

Tree Plantation Program

Trees are vital to the environment. They provide us with fresh air to breathe, a shelter for birds and animals. They also provide us with wood for various purposes, along with many medicinal and spiritual properties. However, deforestation has been its main enemy. This problem needs to be curtailed to ensure that the ecological balance is maintained. Tree plantation is the process of planting seedlings into the ground. This process is in a planned manner. Tree plantation depends upon the geography and the topology of the region. Usually, planting trees that grow quickly are preferred. Many trees are indigenous and are encouraged by many to be grown to maintain natural heritage. Tree plantation refers to planting seedlings in the soil. It is done during the monsoon season, from July to September in India. Seedlings are planted in the Earth, and the types grown are based on soil and climate of the region. Adiwasi Vanvasi Sewa Kendra Planted an approx 1200 Sapling Trees.

The development and promotion of Farmers Groups and Cooperatives in the country have been recognized as an emerging third sector; a vehicle for socio-economic development; and

economic-plus enterprise; and the means to transformational development. Therefore 02 days the Book keeping and leadership training to the executives' members of agriculture and livestock farmers' group has been conducted by AVSK on 09.02.2022. The core objective of the training is to build the knowledge and skills of the office bearers in leading and managing their group, proper record of

books of account, generating group cohesion, enhancing participatory decision making, analyzing sources of conflict and resolving it, communicating effectively and working as a team. Also we have aware about them About Goods Services & tax Benefits and impact of GST In Agriculture sector also covered our Awareness Program. This will eventually culminate into building trust and boosting the performance and income of the groups. The total number of participants from 3 farmer groups was 35 out of which 12 were female participants. The training period was divided into two parts, the first one day was focused on book and record keeping and the remaining one day was used to deliver leadership training.
